0.1 R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   : 2.00
## 1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##   Mean  :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
##   Max.  :25.0    Max.    :120.00
```

0.2 nota al pie

texto¹

0.3 Including Plots

You can also embed plots, for example:

¹nota al pie

```
##   temperature      pressure
##   Min.      : 0      Min.      : 0.0002
##   1st Qu.: 90      1st Qu.: 0.1800
##   Median :180      Median : 8.8000
##   Mean   :180      Mean   :124.3367
##   3rd Qu.:270      3rd Qu.:126.5000
##   Max.    :360      Max.    :806.0000
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
