## 1 Sección

### 1.1 Sub-sección

1.1.1 etc

1.1.1.1 etc

#### 1.2 R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the  $\mathbf{Knit}$  button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

#### summary(cars)

```
##
        speed
                         dist
          : 4.0
                           : 2.00
##
    Min.
                   Min.
    1st Qu.:12.0
                    1st Qu.: 26.00
   Median:15.0
                   Median : 36.00
##
    Mean
           :15.4
                   Mean
                           : 42.98
    3rd Qu.:19.0
                    3rd Qu.: 56.00
    Max.
           :25.0
                   Max.
                           :120.00
```

### 1.3 nota al pie

 $texto^1$ 

 $<sup>^{1}\</sup>mathrm{nota}$ al pie

# 1.4 Including Plots

You can also embed plots, for example:

```
plot(pressure, col = "green", pch = 3)
```

## summary(pressure)

```
##
     temperature
                     pressure
##
           : 0
                         : 0.0002
    Min.
                  Min.
##
    1st Qu.: 90
                  1st Qu.:
                            0.1800
##
    Median:180
                  Median: 8.8000
##
    Mean
           :180
                          :124.3367
                  Mean
                  3rd Qu.:126.5000
    3rd Qu.:270
##
    Max.
           :360
                  Max.
                          :806.0000
```

Note that the echo = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.
